Profile

Computer Science student with a strong foundation in programming and problem-solving. Hands-on experience through academic and personal projects in C programming and basic web development. Eager to learn, build real-world applications, and grow as a software developer.

Education

09/2025 – Present
Tumakuru, India

B.E. – Computer Science and Engineering
Siddaganga Institute of Technology, Tumakuru
Currently pursuing Bachelor of Engineering in Computer Science and Engineering with a focus on programming fundamentals, problem-solving, and core computer science concepts. Gaining hands-on experience through academic and personal projects.

Skills

C Programming ●●●○○
Basic syntax, control structures, functions, arrays, pointers, and file handling. Experience developing small console-based programs and academic projects.

Problem Solving ●●○○○
Logical thinking, breaking down problems into smaller steps, and implementing solutions using programming fundamentals.

Data Structures (Basics) ●○○○○
Understanding of arrays, strings, and basic concepts of stacks and queues through coursework and practice.

Web Development ●●●●○
HTML, CSS, and JavaScript for building basic interactive web pages. Basic familiarity with Firebase, PHP, and SQL for simple backend functionality and data handling.

Tools and IDEs ●●●○○
Visual Studio Code, basic command-line usage, compiling and running C programs. Basic of Git.

AI Prompt Engineering (Basic) ●○○○○
Ability to design clear and structured prompts to effectively interact with AI tools for content generation, code assistance, debugging, and workflow optimization.

Projects

08/2025 – 09/2025

ATM Management System (C)
Developed a console-based ATM system using C programming. Implemented user authentication, balance inquiry, deposit, and withdrawal features.Used file handling for storing user and transaction data.

Certificates

C Programming: 2D Arrays and Pointers
Issued by Infosys Springboard. Covered concepts of two-dimensional arrays, pointer usage, and memory handling in C programming.

AWS Developer Associate: Optimizing AWS
Covered core AWS services, application optimization techniques, and basic cloud development concepts.

Artificial Intelligence for All
Issued by Infosys Springboard. Introduction to artificial intelligence concepts, real-world applications, and ethical considerations.

Hackathon Participation – Text to Quiz Generator
Participated in a hackathon organized by the AI Brewery Club, Siddaganga Institute of Technology, Tumakuru. Developed a text-to-quiz generator application focusing on automated question generation and content processing.

Neural Networks and Natural Language Processing Implementation
Issued by Infosys Springboard. Learned fundamentals of neural networks and basic NLP techniques through hands-on implementation.

Obstacle Avoiding Robot Project
Designed and built an obstacle-avoiding robot during higher secondary education, applying basic electronics, sensors, and logic control.

Courses

11/2025 – Present
Online

Full Stack Web Development(Ongoing)
freeCodeCamp
Learning full stack web development concepts including frontend fundamentals, backend basics, and database integration through structured hands-on coursework.

10/2025 – Present
Online

Data Structures and Algorithms (Basics)
YouTube – Abdul Bari
Learning foundational data structures and algorithm concepts including arrays, recursion, time complexity, and basic problem-solving techniques.

11/2025 – 12/2025
Online

Prompt Engineering for AI
Google (Coursera)
Completed a course on prompt engineering, focusing on designing effective prompts for AI tools to improve accuracy, reasoning, and task performance.

05/2024 – 11/2024
Online

C Programming Fundamentals
YouTube – Shradha Khapra / Apna College
Covered core C programming concepts including variables, control structures, functions, arrays, pointers, and basic problem-solving.

07/2025 – Present
Online

DSA Basics
GeeksforGeeks
Practiced basic data structures and algorithmic problem-solving through tutorials and coding exercises.
